Databricks | Unity Catalog | Terraform | Azure DevOps | CI/CD | Multi-Cloud | FinOps | Python
Senior Architect | 8+ years | University Professor | Azure & Databricks Certified | Available for Remote

ABOUT ME

> Senior DevOps and Multi-Cloud Architect with 8+ years of IT experience, specialized in the architecture, implementation and governance of critical infrastructure on Azure, AWS, Oracle Cloud, IBM Cloud and Databricks Lakehouse. Proven track record building and sustaining complex Data Platforms, focused on advanced CI/CD pipelines, IaC automation (Terraform), observability and cost optimization (FinOps). Solid academic background and an extensive portfolio of international certifications. Also works as a university professor and IT team coordinator.

EXPERIENCE

DevOps Specialist / Data Platform Architect

Nov 2021 – Present

VR Benefícios

- Architect and leader of the complete Data Platform deployment on Microsoft Azure, ensuring high availability, scalability and security compliance.
- Developed and maintains advanced CI/CD pipelines in Azure DevOps, automating deployment, testing and infrastructure management through IaC (Terraform).
- Manages and optimizes resources and costs on the Databricks platform (Lakehouse + AI), applying FinOps practices that reduced operating expenses and maximized performance.
- Implemented governance, security (RBAC, encryption, monitoring), observability and compliance policies across the entire Azure environment, raising the maturity of data operations.
- Negotiates contracts and commercial terms with Databricks and Microsoft, aligning consumption, licensing and platform costs.
- Created reusable ARM Templates for standardized provisioning of Azure resources, alongside Terraform.
- Manages Unity Catalog permissions, cluster policies and governance through policy as code, applied in an automated and auditable way by CI/CD pipelines, in GitHub, GitLab or Bitbucket repositories.
- Responsible for end-to-end Databricks administration (account and workspaces): provisioning via Terraform, network configuration (VNet injection, Private Link), clusters, pools and SQL Warehouses, with cluster policies to standardize environments and control consumption.
- Deployed and administers Unity Catalog (metastore, catalogs, schemas, lineage, granular access control and auditing), with identity management through Microsoft Entra ID (SCIM, groups and service principals) and secrets in Azure Key Vault.
- Structured the Medallion architecture (bronze, silver and gold) with Delta Lake and pipeline orchestration with Workflows / Delta Live Tables and Azure Data Factory.
- Automated the deployment of Databricks notebooks, jobs and configurations (Terraform and Databricks Asset Bundles) integrated with Azure DevOps.
- Implemented DBU cost monitoring with tags, budgets and dashboards, and optimized workloads with autoscaling, auto-termination, spot instances, Photon and Delta table maintenance (OPTIMIZE, Z-ORDER, VACUUM).
- Enabled and governs generative AI and AI/BI features (Genie, dashboards, Model Serving), and maintains platform observability with system tables and alerts, acting as a technical reference and defining best practices for the data teams.

DevOps Engineer / Cloud Project Consultant

2020 – Nov 2021

Accenture Brasil

- Worked on several DevOps projects in multi-cloud environments (Azure and AWS), focused on scalable solutions, process automation and cloud migrations.
- Contributed to building CI/CD pipelines, infrastructure as code configuration and DevOps tool integration in digital transformation projects.
- Responsible for the support and monitoring of critical AWS environments.
- Infrastructure: VM provisioning (EC2) and application deployment with Elastic Beanstalk.
- Optimization & Security: CloudFront deployment, resolution of security issues and Jenkins integration for deployment automation.
- Data: use of Amazon RDS and DynamoDB, Amazon Redshift and S3 for collection, storage and analysis in data lakes.

UNIVERSITY TEACHING

Postgraduate Professor — Specialization in Information Security

Aug 2026 – Present

Faculdade Esuda

- Course: Applied Cryptography and Secure Protocols.

University Professor

2021 – 2025

UniFBV Wyden

- Courses: Programming Paradigms (Python), Graph Algorithms, Logic Programming, Operating Systems, Computer Architecture, Network Fundamentals and Protocols, Cloud Computing/IoT/Industry 4.0, Introduction to Information Security, Layered Computing and Web Services on Linux.

Professor and IT Coordinator

Apr 2018 – Nov 2020

Faculdade Elo, Faculdade UniFBV, Microlins

- Teaching: Computer Engineering, Computer Science, Information Systems and Systems Analysis and Development (QA, Software Testing, Computer Architecture, Logic Programming).
- Management: IT Coordinator / Project Manager at Grupo Elo.

TECHNICAL SKILLS

Cloud — Azure (Data Platform, DevOps, Infra, Security, FinOps), AWS (EC2, S3, RDS, Redshift, VPC, DynamoDB, CloudFront, Elastic Beanstalk), Oracle Cloud, IBM Cloud

Big Data — Databricks (Lakehouse, AI/BI, GenAI, SQL Analytics), Azure Data Factory, Redshift, Data Lakes S3

Databases — Amazon RDS, DynamoDB, SQL Server

Observability — Dynatrace, OpenTelemetry, Datadog (SRE/SIEM)

DevOps / CI/CD — Azure DevOps, Jenkins, Terraform (IaC), ARM Templates, Kubernetes, Docker, Linux

Languages / Version Control — Python (PySpark), SQL, Bash, PowerShell, HCL (Terraform), YAML, JSON, Git, GitHub, GitLab, Bitbucket

Security — Fortinet (FCA/NSE), Zero Trust, ITIL v3, DevSecOps, IBSEC

Containers — Docker, Kubernetes (GKE, AKS), IBM Containers Essentials

CERTIFICATIONS

Azure DevOps Engineer Expert (AZ-400)

Microsoft — Microsoft Certified

Expert · DevOps on Azure
